Period:

The Scenario	How would this affect your business?	What could fix this problem?
You draw custom designs on sneakers and sell them online. You sell each pair for about \$80. When people buy a pair of your custom sneakers, you mail the sneakers to them. There is only one post office in your town, and they used to charge \$6.00 to ship one pair of sneakers, but 3 months ago they raised the price to \$12, and last month they raised it to \$22!
